PROFILE

A Computer Science student specializing in Intelligent System with hands-on experience training and deploying machine learning models, integrating LLMs into web-based products, and real production software development experience. Seeking an internship to contribute to impactful technology solutions and grow across engineering disciplines.

EDUCATION

Bina Nusantara University — Bachelor of Computer Science (S.Kom.) **2024 - Present**

- **Relevant Coursework:** Algorithm & Programming, Data Structures, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Software Engineering, Database Technology
- **GPA:** 3.69

EXPERIENCE

Programmer at Bina Nusantara IT Division **March 2026 - Present**

- Developed and maintained the Binusmaya website using **TypeScript** and **React**, supported by a **C#** backend architecture to build reliable features and optimize the end-user experience.
- Validated backend data transactions and troubleshoot system flows by querying relational database tables using **SQL Server Management Studio (SSMS).**
- Deployed scalable production-level applications on **Azure DevOps,** collaborating within an **Agile Scrum** framework and utilizing **Git** for robust version control.

Student Learning Partner (SLP) Mentor Student Advisory & Support Center (SASC) **February 2026 - July 2026**

- Mentored and coordinated a study group of 9 university students, providing targeted academic support to help them overcome difficulties in challenging courses.
- Developed valuable leadership and communication skills through consistent student mentoring, relationship building, and teaching processes.

PROJECTS

Fruit Freshness Classification — Deep Learning Research (ICORIS)

Tools: Python, TensorFlow/Keras, MobileNetV2, EfficientNetB0, VGG16, MobileViT-XS, Transfer Learning

- Compare 4 CNN architectures for fruit freshness classification, to identify an optimal baseline that balances high classification accuracy with low computational latency.
- Selected **MobileNetV2** for its lightweight inference speed and engineered **MobileNetV2-Fusion** by integrating a **dual-level feature fusion mechanism** to capture mid-level textures.

NLP Sentiment Analysis — Indonesian Financial News

Tools: Python, scikit-learn, Sastrawi, IndoBERT, IndoDistilBERT, Random Forest, SVM, Streamlit, HuggingFace

- Benchmarked **Random Forest**, **SVM**, **IndoBERT**, and **IndoDistilBERT** for sentiment analysis of Indonesian financial news headlines (CNBC Indonesia).
- Deployed the finalized model via an interactive **Streamlit** web application hosted on **HuggingFace Hub**, successfully engineering a workaround for GitHub's large-file storage limits.

Gymbot — Context-Aware AI Fitness Assistant

Tools: Node.js, Express.js, Gemini API, JavaScript

- Engineered a context-aware virtual trainer backend integrating the **Gemini API** with dynamic prompts to transform user metrics (BMI, goals) into personalized routines.
- Built production grade API resilience by implementing a custom exponential backoff retry algorithm to gracefully handle transient errors and rate limits.

Mind Sense AI — Student Stress Prediction

Tools: Python, scikit-learn, Pandas, Streamlit

- Developed an **end-to-end machine learning pipeline** to classify university student stress levels based on behavioral and academic factors.
- Engineered feature preprocessing including **standardized scaling** and **categorical encoding,** while benchmarking **Logistic Regression**, **SVM**, and **Random Forest** Algorithms.
- Evaluated model performances using **AUC, precision, and F1-score** metrics, deploying the optimal architecture as an interactive **Streamlit** web application for real-time prediction.

SKILLS

- **Languages:** Indonesian, English
- **Programming Languages:** Python, C, C#, SQL, TypeScript, JavaScript, HTML, CSS
- **Software:** Git/GitHub, Figma, Azure DevOps, HuggingFace, Streamlit, Vercel
- **Frameworks:** TensorFlow, Keras, Pandas, NumPy, Scikit-Learn, PyTorch, OpenCV, React.js, Next.js, Node.js/Express
- **Techniques:** Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Model Deployment, Transfer Learning, Prompt Engineering, LLM Integration, Recommender Systems

CERTIFICATIONS

- **Microsoft Certified Azure AI Fundamentals (AI-900)** **March 2026**
  Issued by Microsoft
